PROFILE

Product-first engineer who treats engineering as a strategic business driver and growth multiplier. I dive deep into legal, financial, and compliance context independently — delivering **\$12M revenue impact within 6 months** and consistently better processes, pipelines, and observability. I think like an owner and bring results.

Languages: EN, ES, NL, FR · Available as employee or B2B · Flexible across timezones

AWARDS

- ★ Microsoft Windows Insider MVP: 2016–2020
- ★ Microsoft MVP: Windows Development 2016
- ★ Lenovo Community Advocate 2014, 2016
- ★ Microsoft MVP: Windows Expert Consumer 2014

PROFESSIONAL EXPERIENCE

NAGA, Remote

Engineering Manager (Crypto) | May 2025 – Present

- Analysis of vendor contracts to optimize cost efficiency for the crypto portfolio.
- Payment integrations with Thredd using ISO 8583 & ISO 18245.
- Led reporting of strategies for product analysis to track relevant customer behavior.
- Cut network traffic for NAGA One by at least 50% with architectural optimizations.
- Reduced NAGA One iOS memory consumption by up to 75%.
- Influenced & optimized product requirements to cut implementation cost and complexity by at least 80%.
- Managed a team of 7 members in a fast-paced environment.
- Navigated European crypto regulations independently to ensure MiCA compliance.

Technologies: .NET 6-9, Apache Kafka, ASP.NET MVC, AWS, iOS (UIKit, MVVM, Coordinator, Swift 5), Java, Microsoft SQL Server, MQTT, Node.js (Express), Postgres, React, Redis

Bitwarden, Remote

Senior Software Engineer | Jun 2023 – May 2025

- Developed & published SDKs for Node.js, .NET, Android and Blazor Web Assembly.
- Enhanced application observability: logging, tracing, alerting, and data collection for customer-facing SDKs.
- Ensured architecture can accommodate future growth. Reduced network traffic by 88%.
- Designed & executed a robust sales tax compliance strategy aligned with Bitwarden's accelerated global growth, driving \$12M in revenue impact within 6 months on the billing team.
- Managed & documented secure payment integrations: Stripe, PayPal & BitPay.
- Optimized top endpoints leveraging Datadog, cutting request time by up to 70%.
- Release management, documentation, and execution planning in a cloud-native Azure environment.

Technologies: .NET 7-9, Android, Angular, ASP.NET MVC, Blazor, Bootstrap, C#, Datadog, Docker, Java, Kotlin, Node.js, OIDC, React, Tailwind, Vue.js, WebAuthn

Oval Money, Remote (Insolvent)

Senior Software Engineer | Jul 2021 – Apr 2023

- Developed real-time collaboration web applications using .NET 6, Java, Hazelcast and AWS ECS Fargate.
- Designed & led development of fault-tolerant real-time transaction screening for AML using Kafka, .NET 6, Kubernetes.
- Designed and developed an entire new back office to manage 22,000+ customers using Vaadin, Java 17, PostgreSQL, Kubernetes.

- Led team of external contractors on a rebranding project of a client-facing website with 85,000 unique users/month using Strapi and Next.js.
- Led Spanish payroll administration of 2 full-time employees.
- Responsible for payment services using open banking and card payments using TrueLayer, Checkout and TrustPayGlobal.
- Written infrastructure-as-code using Terraform for AWS ECS Fargate.
- Mentored, trained and onboarded co-workers; conducted technical interviews for 20+ applicants.

Technologies: .NET Core 3.1–7.0, C#, Java 17-19, Spring, Vaadin, Kafka, Hazelcast, RabbitMQ, AWS (ECS, EC2), Terraform, Azure AD, Circle CI, Splunk, Next.js, React, Strapi

Yuki Software SL, Remote

Senior Software Engineer | Dec 2020 – Jul 2021

- Led integration of third-party web services with cross-functional teams.
- Developed and cultivated the QA team through interviewing, hiring, on-boarding, and continuous development.
- Created build & release pipelines in Azure DevOps.

Technologies: .NET, .NET Core, AWS (Lambda, Step Functions, S3), ASP.NET Forms, Azure DevOps, C#, Selenium, TDD

KPMG, Remote

Lead Software Engineer | Aug 2019 – Nov 2020

- Oversaw a team of 2 developers migrating a legacy web application to modern technologies.
- Development of a web application for tax and VAT declarations using React and .NET.
- Development of a web extension with native messaging to open sites in alternate browsers for internal use.

Technologies: .NET Core/Framework, Angular, React, ASP.NET, Azure, Azure Functions, Azure AD, C#, SharePoint, Typescript, UWP, WCF

Mozzeno, Belgium

Full Stack Engineer | Dec 2018 – Aug 2019

- Achieved over 90% code coverage using TDD with unit testing & integration testing for the back-end.
- Full-stack development to balance workload between front-end and back-end developers.

Technologies: Angular, PrimeNG, ASP.NET Web API, C#, Entity Framework, MySQL, AWS (S3, CloudWatch), CQRS, Event Sourcing

SBB, Belgium

Full Stack Engineer | Jun 2017 – Dec 2018

- Led automation project for VAT, ICP and client listing declarations for 23,000+ clients.
- Mentored a junior software engineer and gathered requirements from stakeholders.
- Created build & deploy pipelines in Azure DevOps.

Technologies: Angular, ASP.NET Web API, Azure, Azure Functions, C#, Entity Framework, MS Service Fabric, SSRS, VB6, WPF

ProjectIN, Belgium (Insolvent)

Consultant | Jul 2015 – Aug 2016

- Proactively identified & developed automation solutions using PowerShell to reduce resource spending.
- Identified client needs and planned Microsoft Project Server integration strategies.
- Research & development of proof of concept using the HL7 protocol.

Technologies: ASP.NET MVC, Azure, C#, Entity Framework, Office 365, Microsoft Project Server, PowerShell, T-SQL
